How can

CHINESE MEDICINE and
FAMILY CONSTELLATIONS
help you heal your body and soul?

Join us to learn about the emotional and spiritual aspects of CHINESE MEDICINE and how stuck energy in our bodies and in our relationships with our family and/or ancestors affect our sense of well being.

In this workshop we will explore the basic principles of Chinese Medicine and use specific acupuncture points and basic yoga poses to learn about our organs and their energy pathways in the body. Whatever is going on within our bodies is being reflected in our lives as well. We will learn about the natural orders of love and how we are affected by the feelings, behaviors and fates of our families.

If the energy in our bodies and lives doesn't flow freely, it may cause chronic pain, insomnia, digestive problems, addictions or cancer.
